

Kevlacad launches 10.5 Flybridge

Specialist powered-catamaran manufacturer Kevlacad Power Boats Australia has released the first images of its all-new 10.5 metre Flybridge Sports cruiser. This new design will be the launching pad for Kevlacad's push to a full range of more stylish, modern and aesthetically pleasing designs.

Known for their seakeeping ability and soft, dry ride, Kevlacad hulls have been favoured among serious fishermen, commercial operators and rescue organisations alike. The new 10.5 Flybridge Sports cruiser retains the Kevlacad hull but has been designed with family boating in mind includ-

The new Kevlacad 10.5 Flybridge Sports cruiser.

Stovetop toaster roaster

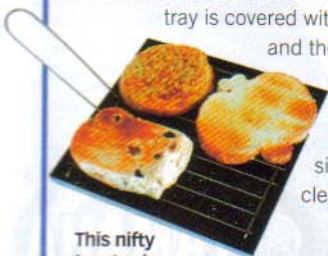

This great invention is designed for toasting, roasting, melting and heating on your stovetop at home or while boating. It is simple to use on all stovetops, whether you use gas, electricity, charcoal or even a wood fire. The tray is covered with baked enamel and the grid and handle

are made from stainless steel. The toaster is simple to store and clean – simply lift the top grid and wipe it clean. It folds to a thin

square placing the handle under the grid for easy storage.

As well as making toast, it can be used as a diffuser to prevent setting or burning a stew at the bottom of a casserole. For veggies or fish (softer substances), it's best to place aluminium foil over the grid so they don't touch the hot base. To melt chocolate or butter, simply place into a bowl on the grid of the toaster on low heat.

The compact energy-saving and hygienic toaster measures 20 by 20 by 1 cm and weighs about 300 grams. More information from (02) 4257 3182 or visit www.argau.com.au.

This nifty toaster is versatile and compact.

ing features such as accommodation for four, a generous-sized bathroom, fully equipped galley and a spacious saloon. Serious fishing is still catered for with excellent vision from the flybridge and a number of fishing options including gamechair, outriggers and livebait tank.

The Kevlacad 10.5 has a beam of 3.54 metres, a draft of 0.9 metres in shaftdrive configuration, a displacement of 9,000 kgs with 1,500 litres of fuel and 400 of freshwater. A number of power options cover four-stroke outboards to 275 hp or diesel inboards to 350 hp, both in twin configuration to cruise speeds between 25 and 30 knots. For more information call (07) 5493 3799 or visit www.kevlacad.com.au.
